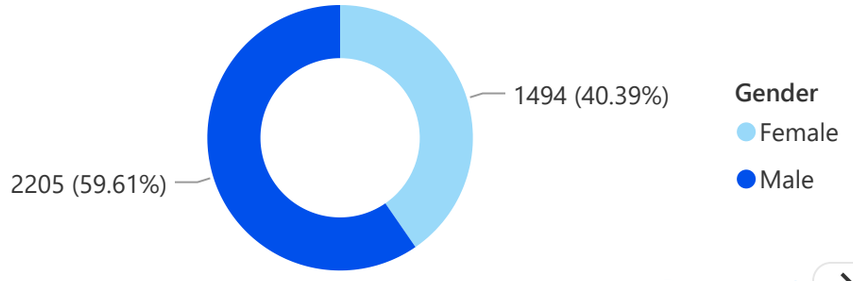
Gender gap in employment may affect attrition

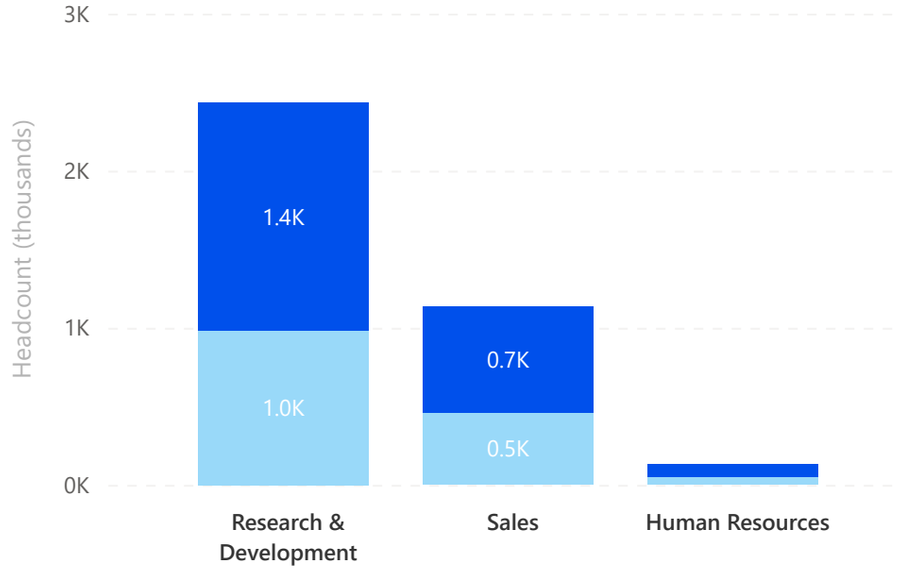
Nearly 60:40 male-to-female ratio implies a gender imbalance in the workplace.



Departmental

Departmental gender gap underlines the imbalance

Currently, more male than female employees are working in each department.



Manager Survey

Overview | Attrition Analysis

Too many great employees with high dedication were left unpromoted, too many great employees had quitted or will leave soon.

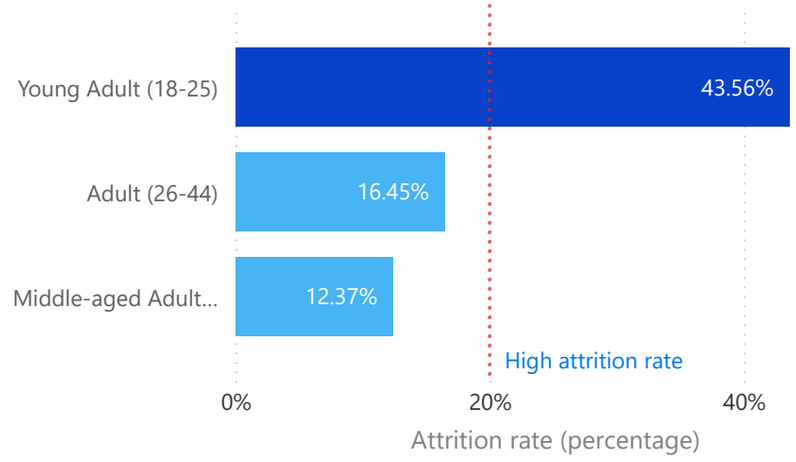
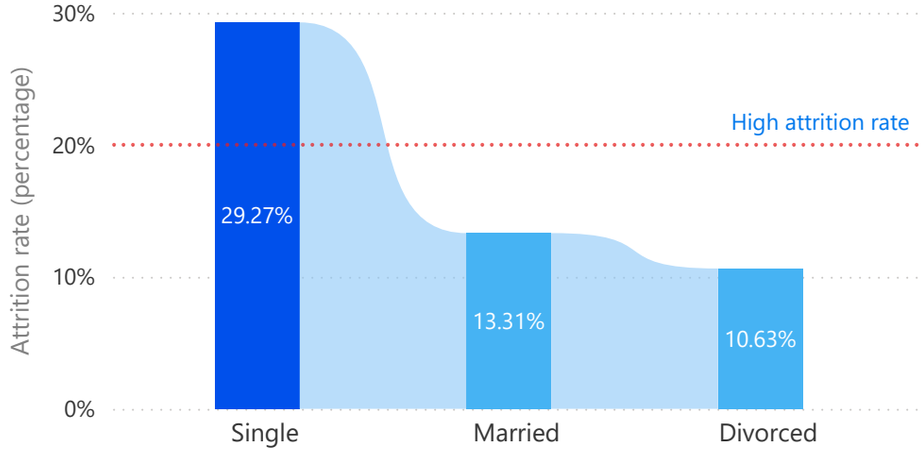
Absurdly high attrition rate among young adult employees

Early attrition could indicate onboarding or mismatch issues.



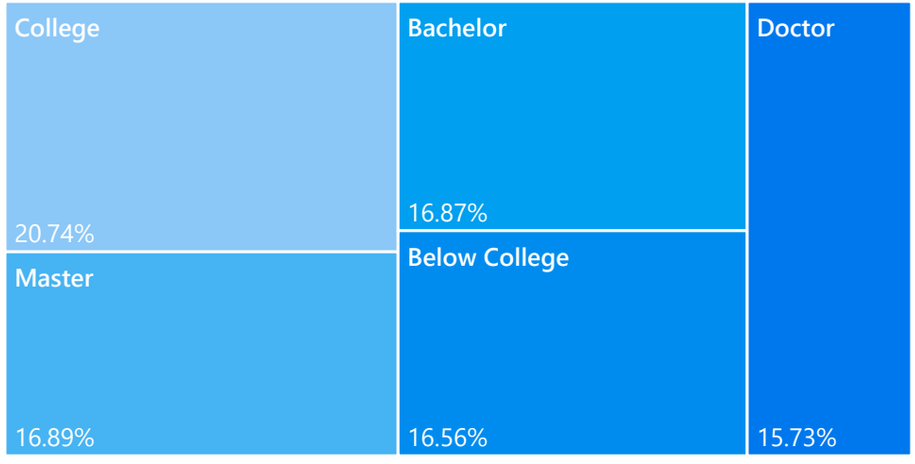
Too many single employees left

Married and divorced employees are less likely to leave, opting for stability.



Attrition rate above 15% for all education levels

College-level workers have the highest attrition rate among others.



More male employees left across all departments

Attrition may be affected by the 60:40 male-to-female employee ratio.

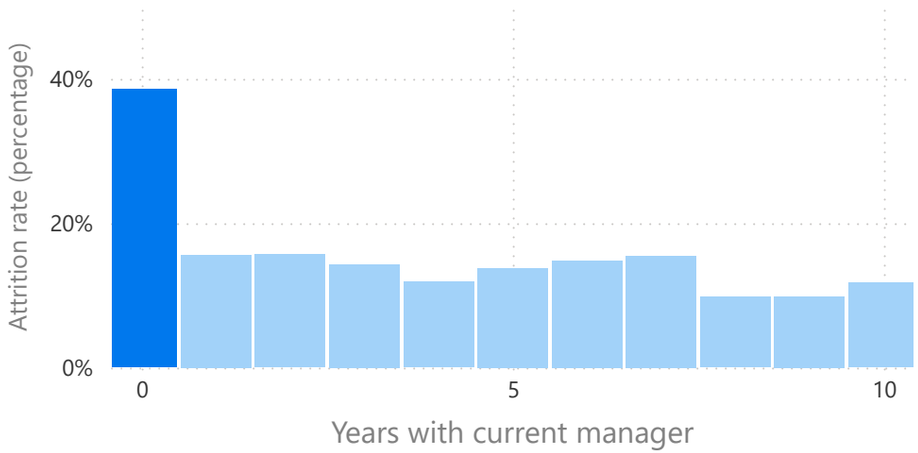
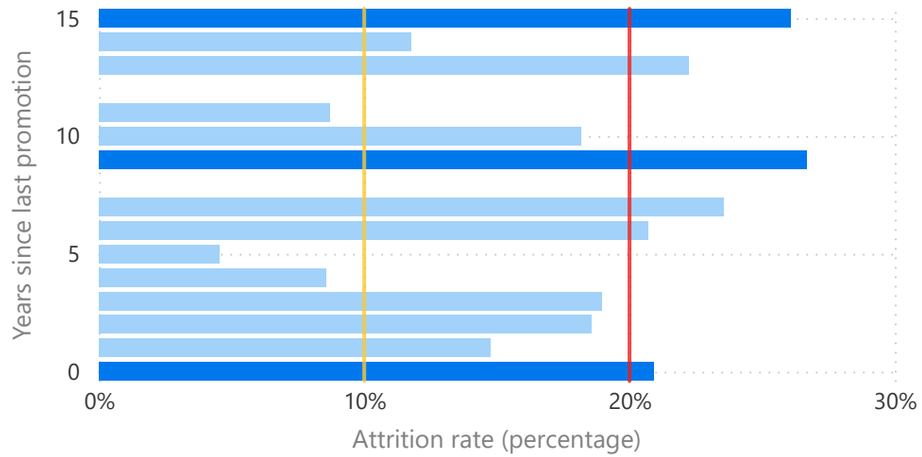
Most leavers did not spend a year with their manager

Attrition rate is especially high for leavers who barely worked with management.



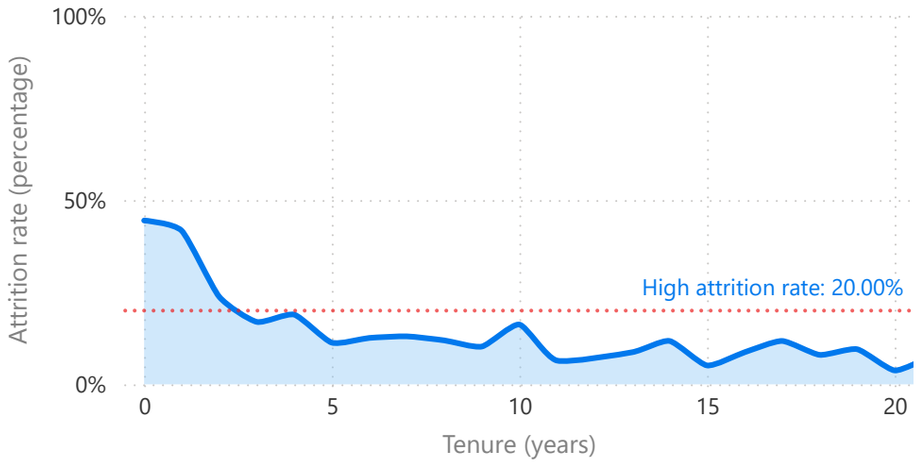
Attrition across all levels of service

Both promotion-stalled and newly-promoted employees left the company.



Very high attrition rate for short-tenure employees

However, attrition rate tends to fall as tenure and loyalty rises.



Most leavers have worked at 5 companies or more

# of Companies Worked	# of Leavers	Attrition Rate	Retention Rate

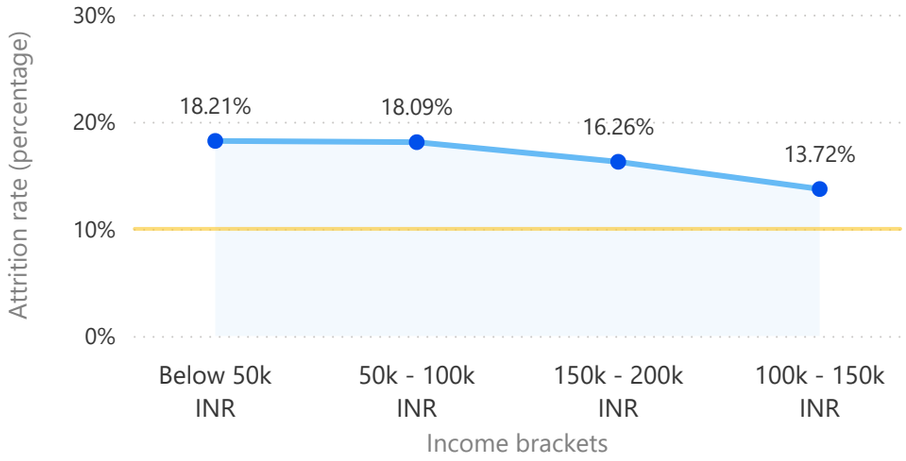
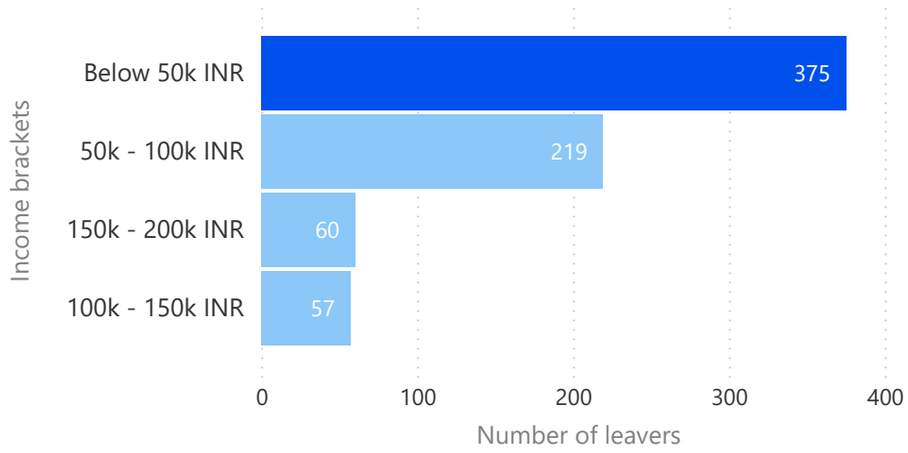
Attrition falls as income rises, but concerns still remain

Despite this trend, the attrition rate for all income ranges is still above 10%.



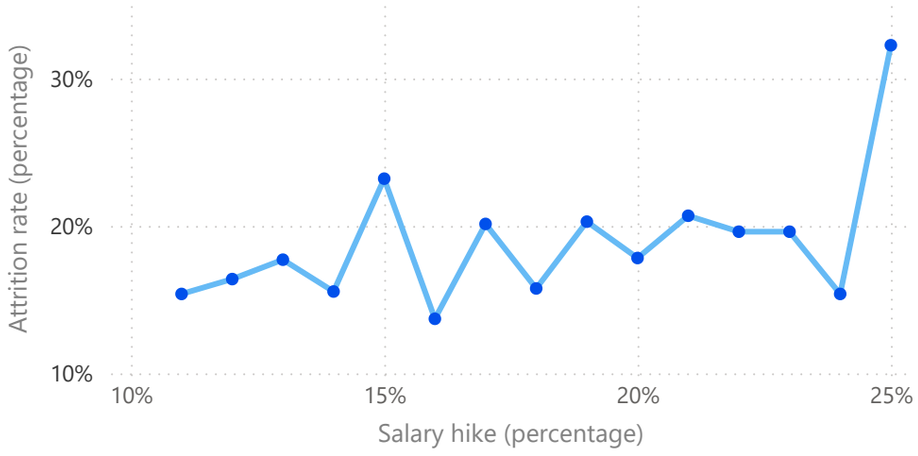
Most exits came from lower-income tiers

Yet workers from high-income brackets still left the company.



Salary hikes did little to prevent attrition

Employees still left the company even with raises as high as 25%.



Unfair stock option levels may contribute to attrition

Manager-level workers have fewer stock options despite their high tenure.

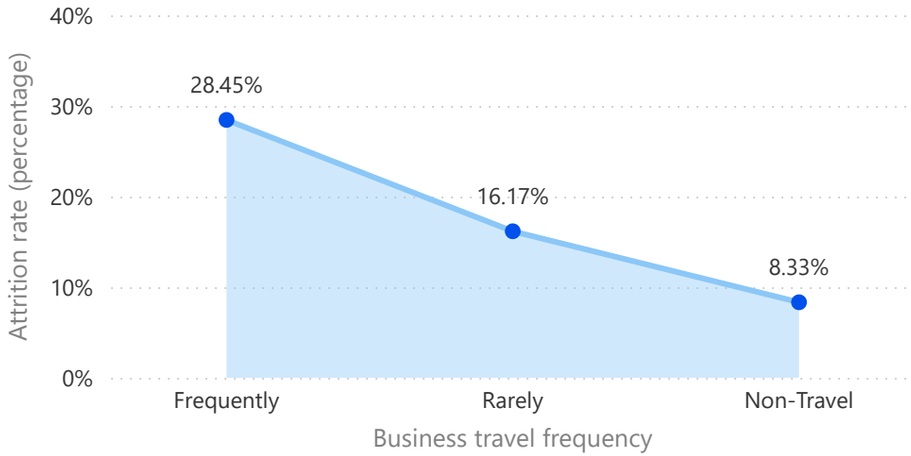
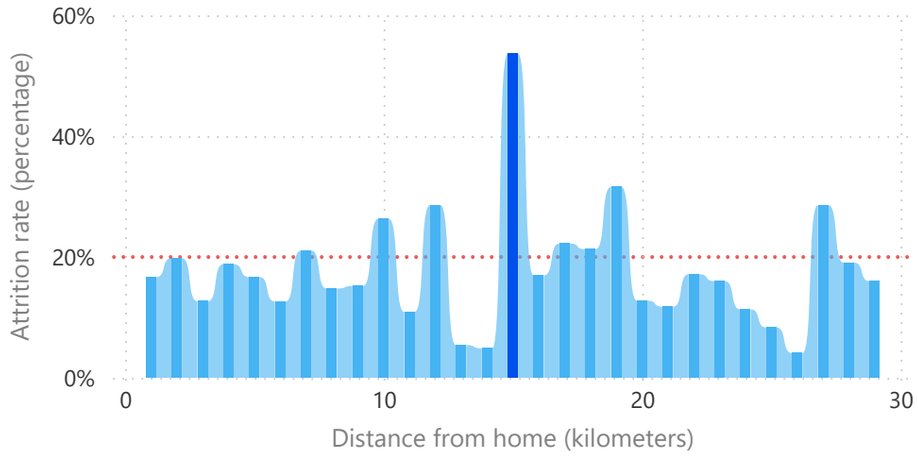
Frequently traveling employees quit more

However, attrition rate clearly falls as business travel frequency decreases.



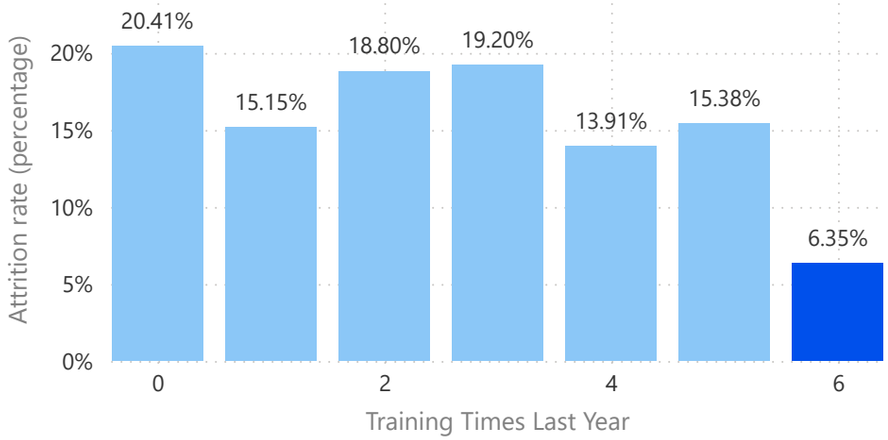
No clear pattern between attrition and travel distance

Still, employees living 15 kilometers away have a very high attrition rate.



Training frequency has an unclear influence

Note that employees trained 6 times last year have a much lower attrition rate.



Research roles in the company have high attrition rates

Job Role	# of Leavers	Attrition Rate	Retention Rate
Research Director	57	26.95%	76.25%
Research Scientist	159	19.96%	81.85%
Sales Executive	165	18.43%	83.13%
